

DIRECT

EMULSIFIABLE CONCENTRATE (EC)

Plant-Derived Foliar Spray

Ingredients: Plant extract, Nutrients and micro-nutrients and inert co-formulants

EdenShield **DIRECT** is based on a medicinal desert plant extract for plant nutrition and enhanced defence against harmful insects.

EdenShield **DIRECT** contains elements (K, Ca, Mg, S, Fe) essential for plant nutrition and development.

EdenShield **DIRECT** contains unique aromatic ingredients that protect the plants from the attraction of attacking harmful insects.

EdenShield **DIRECT** is applied by spraying the plants directly or by using irrigation as well as fogging systems.

READ INSTRUCTIONS CAREFULLY BEFORE USE
NOT FOR DOMESTIC USE - AGRICULTURAL USE ONLY

INSTRUCTIONS FOR USE

Apply product throughout the whole season for the fertilization and protection of vegetables, ornamentals, herbs and orchards.

Fill sprayer half full with water, add desired amount of EdenShield **DIRECT**, fill rest of the water while agitating. Keep agitator working continuously.

When applying EdenShield **DIRECT** using high pressure irrigation or fogging systems use 0.2%-0.5% concentration and administer for 10-15 seconds several times per hour along the day.

CROP	Sprayed part	Dosage (per 1000 msq)	Spray volume (per 1000 msq)	Spray intervals
