EMULSIFIABLE CONCENTRATE (EC)

## Plant-Derived Agro-Technical Treatment

For the Repellency of Insects Applicable by Spraying over Greenhouses Walls, Entrances and Covers.

Ingredients: Plant extract and inert co-formulants

EdenShield **NET** is based on a medicinal desert plant extract for insects repellency.

EdenShield **NET** contains aromatic ingredients that protect the plants from the attraction of attacking harmful insects.

EdenShield **NET** is applied by spraying directly the screens, nets and entrances of greenhouses and plastic tunnels or by using sprinkler or fogging systems.

**READ INSTRUCTIONS CAREFULLY BEFORE USE**  
**NOT FOR DOMESTIC USE - AGRICULTURAL USE ONLY**

## INSTRUCTIONS FOR USE

Apply EdenShield **NET** throughout the whole season for the protection of vegetables, ornamentals, herbs and orchards.

### Greenhouse Entrances and Ventilation Openings

Dilute EdenShield **NET** 1:10 (10 ml of product to 100 ml final volume). Fill sprayer half full with water, add desired amount of EdenShield **NET**, fill rest of the water while agitating. Keep agitator working continuously.

Spray every morning. Apply 100 ml of spray (10%) over every 1 meter square of sprayed area. Make sure all parts of sprayed area are fully covered.

### Sprinkler and Fogging Systems

Dilute EdenShield **NET** in water to 0.25%-1% (10 ml to 1 L application volume).  
Apply 10-15 seconds 3-4 times each hour during daytime.

\*EdenShield **NET** is available in 2L and 5L containers
